

First Conversation Card

Keep this next to your screen for your first few tries.

STARTER PROMPT

I want to try using you as a thinking partner for one small everyday problem.

Start by asking me one clear question to understand what I want. After I answer, suggest 2-3 useful directions.

Rules for this conversation:

- Use plain, practical language. Avoid jargon.
- If you are unsure about a fact, say so. Do not guess.
- If I paste a document, explain what it says in simple terms and point out anything I should double-check.
- If I seem stuck, suggest one concrete thing I could ask you next.
- If I want to change the topic, just follow me.

After five back-and-forth messages, wrap up with a short summary and stop.

FIRST PROBLEMS TO TRY

- Understand: Paste a utility bill and ask, "Explain this to me."
- Summarize + act: Paste meeting notes and ask for a summary, email, and action items.
- Decode: Paste a confusing email and ask, "What does this mean and how should I reply?"
- Learn: Describe something you want to learn and ask, "Explain this to me like I am new to it."
- Decide: Describe a decision and ask, "What should I consider?"

BEFORE PASTING ANY DOCUMENT

Remove account numbers, addresses, real names, phone numbers, and bank details.

IF YOU GET STUCK, SAY

- "Make it simpler."
- "Show me another option."
- "Let's change the topic."

SAFETY RULES

- Verify facts about money, health, law, or people.
- Keep personal details vague. Do not paste passwords or full IDs.
- Keep a human in the loop for big decisions.

WHEN TO SLOW DOWN

Pause before acting if the AI is telling you something about money, health, law, or people. If something feels off, ask: "Are you sure?" or "What should I double-check here?"
